

After Effects CC - beginners to advanced

Whether you are a motion graphics designer, visual effects artist, video editor, or a rich media designer for the web, Adobe After Effects CC lets you design and animate with greater creative freedom.

This 3-day course is designed to allow those new to post production techniques to get the most from this immensely powerful software. We use practical exercises which will cover incorporating footage with Photoshop graphics, video layering techniques, working with key frames, using masks for special effects and rendering your final project. You will also learn different rendering techniques to optimise the finished production for broadcast, DVD or the web.

Topics

New Features in Adobe After Effects CC

- Explore new enhancements and features in the latest incarnation of After Effects CC

Knowing the Workflow

- Introduction to the workspace
- Customizing the workspace
- Importing media and footage
- Working the media

Basic Animation with Effects and Presets

- Setting up the project
- Creating the composition
- Working with layers
- Applying effects and presets
- Rendering

Animating Text

- Using a text animation effect
- Animation using Parenting
- Importing Photoshop text
- Text along a path

Multimedia Animation

- Animating Scenery with parenting
- Masking video into vector
- Keyframing a motion path
- Applying effects
